PROFILE SUMMARY

Aspiring Software Developer with hands-on experience in backend and full-stack development, building RESTful APIs and AI-powered applications using Python, Django, and FastAPI. Skilled in PostgreSQL, MongoDB, and AWS services (S3 and RDS), with familiarity in Docker, CI/CD, and automated testing using Pytest and Playwright. Experienced in LLM integration, RAG, and workflow automation. Interested in developing scalable backend systems and reliable software solutions.

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL
Frontend: HTML5, CSS3, React.js
Backend: FastAPI, Django, RESTful APIs, Celery
Database & Caching: PostgreSQL, MongoDB, Redis, Vector Databases, Django ORM, SQLAlchemy
Testing & Automation: pytest, Playwright
Cloud,CI/CD & DevOps: Linux(Ubuntu), AWS(S3, IAM, EC2, RDS), CI/CD, Git, GitHub, GitHub Actions, Jenkins, Docker, Docker Compose, Kubernetes, Terraform
AI Technologies: LLMs, Retrieval-Augmented Generation (RAG), Ollama, Embeddings, Hugging Face, LangChain
Developer Tools & Workflow Automation: VS code, Antigravity, Swagger UI, Postman, n8n
Core Concepts: Object-Oriented Programming (OOP), DBMS, MVC-Architecture, HTTP Methods, REST API Fundamentals, CI/CD Fundamentals
Data Engineering: Databricks, PySpark

WORK EXPERIENCE

Full-Stack Developer Intern — Finstein Advizory Service LLP | July 2026 – Present

- Developing and testing backend services using Python and FastAPI.
- Building and integrating REST APIs to support frontend-backend communication.
- Working with PostgreSQL for backend data storage and querying across projects.
- Gaining hands-on exposure to data engineering workflows using Databricks and PySpark.
- Working with development and testing workflows as part of application development.

Computer Science Intern – Chennai Metro Rail Limited | June 2025

- Worked with IT systems involving data management, software monitoring, and troubleshooting.
- Gained practical exposure to enterprise networking, relational databases, and process automation.

PROJECTS

Employee Wellbeing & Activity Monitoring System
Technologies: Python, FastAPI, PostgreSQL, React.js, TypeScript, Ollama, Qwen 3, OpenAI API(gpt-5.6-luna)

- Developed an activity monitoring system with encrypted local storage, automatic synchronization, and retry handling.
- Built FastAPI APIs with PostgreSQL integration for activity tracking, employee dashboards, and AI-powered wellbeing reminders.
- Evaluated 2 LLMs (Qwen 3 and OpenAI) using identical prompts, selecting OpenAI based on response quality and achieving 95% positive evaluation results.

Food & Nutrition Tracking System
Technologies: Python, FastAPI, PostgreSQL, React.js, OpenAI API(gpt-5.6-luna), AWS S3, Boto3

- Developed an AI-powered food tracking application with image-based food analysis, calorie estimation, and personalized nutrition recommendations.
- Built FastAPI APIs for authentication, meal tracking, food image analysis, and water management, integrating PostgreSQL and AWS S3.
- Tested food image analysis and achieved 75% satisfactory calorie estimation results; implemented and tested automated meal and water reminders.

Cargo Shipment Email Automation
Technologies: n8n, Microsoft Outlook, Claude AI, Excel, OneDrive

- Developed an n8n workflow to monitor and process incoming cargo shipment emails from Microsoft Outlook.
- Automated extraction of shipment details, including customer names, container numbers, ports, vessel details, ETD, ETA, and shipment status.
- Implemented customer matching against master Excel records and generated customer-specific shipment reports, reducing manual processing effort by 82%.

EDUCATION

B.E. Computer Science and Engineering – Velammal Engineering College | 2023 – 2027 | CGPA: 8.26/10
Higher Secondary (Class XII) – Don Bosco Matriculation Hr. Sec. School | 2023 | 79.9% (479/600)
