SANDHYA R

SOFTWARE DEVELOPER

+91 7358412530 sandhyasubha192005@gmail.com linkedin.com/in/sandhya192005

PROFILE SUMMARY

Aspiring Software Developer with hands-on experience in full-stack development, backend engineering, and AI-powered applications. Skilled in Python, FastAPI, JavaScript, React.js, and RESTful API development, with experience working with PostgreSQL, MongoDB, Redis, and AWS services (S3 and RDS). Familiar with Celery, Docker, Git, CI/CD, and automated testing using Pytest and Playwright. Also experienced in AI technologies, including LLMs, RAG, embeddings, and data processing using Databricks and PySpark. Eager to build scalable applications, solve real-world problems, and contribute to innovative software solutions.

SKILLS

Programming Languages: Python, Java, JavaScript, TypeScript, SQL
Frontend: HTML5, CSS3, React.js
Backend: FastAPI, RESTful APIs, Celery
Database & Caching: PostgreSQL, MongoDB, Redis, Vector Databases
Testing & Automation: pytest, Playwright
Cloud,**CI/CD & DevOps:** AWS (S3, RDS), CI/CD, Git, GitHub, GitHub Actions, Jenkins, Docker, Docker Compose, Kubernetes, Terraform
AI Technologies: LLMs, Retrieval-Augmented Generation (RAG), Embeddings, Hugging Face, LangChain
Developer Tools & Workflow Automation: Swagger UI, Postman, n8n
Core Concepts: Object-Oriented Programming (OOP), DBMS, MVC-Architecture, HTTP Methods, REST API Fundamentals, CI/CD Fundamentals
Data Engineering: Databricks, PySpark

WORK EXPERIENCE

Full-Stack Developer Intern — Finstein Advizory Service LLP | July 2026 – Present

- Developing and testing backend services using Python and FastAPI.
- Building and integrating REST APIs to support frontend-backend communication.
- Working with PostgreSQL for backend data storage and querying across projects.
- Gaining hands-on exposure to data engineering workflows using Databricks and PySpark.
- Working with development and testing workflows as part of application development.

Computer Science Intern – Chennai Metro Rail Limited | June 2025

- Worked with IT systems involving data management, software monitoring, and troubleshooting.
- Gained practical exposure to enterprise networking, relational databases, and process automation.

PROJECTS

Employee Wellbeing & Activity Monitoring System
Technologies: Python, FastAPI, PostgreSQL, React.js, TypeScript, Ollama, Qwen 3, OpenAI API(gpt-5.6-luna)

- Developed an activity monitoring system with encrypted local storage, automatic synchronization, and retry handling.
- Built FastAPI APIs with PostgreSQL integration for activity tracking, employee dashboards, and AI-powered wellbeing reminders.
- Evaluated 2 LLMs (Qwen 3 and OpenAI) using identical prompts and selected OpenAI based on response quality.

Food & Nutrition Tracking System
Technologies: Python, FastAPI, PostgreSQL, React.js, OpenAI API(gpt-5.6-luna), AWS S3, Boto3

- Developed an AI-powered food tracking application with image-based food analysis, calorie estimation, and personalized nutrition recommendations.
- Built FastAPI APIs for authentication, meal tracking, food image analysis, and water management, integrating PostgreSQL and AWS S3 for image storage and retrieval.
- Implemented and tested automated meal and water reminder workflows.

Cargo Shipment Email Automation
Technologies: n8n, Microsoft Outlook, Claude AI, Excel, OneDrive

- Developed an n8n workflow to monitor and process incoming cargo shipment emails from Microsoft Outlook.
- Automated shipment information extraction, including customer names, container numbers, ports, vessel details, ETD, ETA, and shipment status.
- Implemented customer matching against master Excel records and generated customer-specific shipment reports for review.

EDUCATION

B.E. Computer Science and Engineering – Velammal Engineering College | 2023 – 2027 | CGPA: 8.26/10
Higher Secondary (Class XII) – Don Bosco Matriculation Hr. Sec. School | 2023 | 79.9% (479/600)
